

# **EU TDI developments 2023**

Thomas Langelaar (DG TRADE, Head of Sector G.3)

### **Overview**

- Extension of Anti-Dumping measures-Stainless Steel Hot Rolled Flat Products originating from Indonesia and consigned from Türkiye (OJ L 103 of 18.4.2023)
- Continuation of the investigation in the interest of the Union- Fatty acid from Indonesia (OJ C 18 of 19.1.2023)
- SMEs matter- Ceramic tiles from India and Türkiye (OJ L 41 of 10.2.2023)

### **Extension of AD measures - SSHR**

### **Findings**

- Measures on Indonesian SSHR were found to be circumvented via Türkiye.
- After imposition of measures on Indonesian SSHR, SS Slabs from Indonesia were exported to Turkiye where they were Hot Rolled and exported to the EU.
- Exports of Indonesian slabs for hot rolling purposes in Türkiye no other justification than to circumvent the measures: despite change in CN code, no economic justification and not enough added value (around 5%).
- Hot Rolling of the slab, although practically the only RM input, is considered assembly/completion as per Art.13(2).

### Continuation of the investigation in the interest of the Union- Fatty acid

### **Main points**

- After final disclosure, the complainant withdrew.
- The Commission decided to continue the investigation since all the conditions for the imposition of definitive measures were fulfilled.
- Application of Art.7(2a): The investigation concluded that the conditions for application of Art.7(2a) were met and that it was in the interest of the Union to determine the duties on basis of the dumping margin instead of the lower underselling margin.

### **SMEs matter- Ceramic tiles**

### **Main points**

- Fragmented Union industry consisting of over 300 companies of different sizes, employing 54 500 people.
- Sample of Union industry based on three Categories of producers (large, medium and small) to ensure proper representation.
- Art.2(10) adjustments: for mark-up achieved by related traders and adjustment for currency conversion (Art. 2(10i)).
- Inclusion of future costs for environmental measures resulting from compliance with Environmental Agreements in accordance with Art. 7(2d) for the injury margin calculation.

## Thank you

(and have a look at today's OJ)
