“ As someone who throughout secondary school relied on memory and never properly studied, I was in for a rude awakening with the transition into university! This BA Prep programme helped me develop a good work ethic and learn how to study and find which methods worked best for me. It also helped improve my academic writing skills and gave me the confidence to be at ease when presenting in front of people. In one semester, I learned many skills that I still use on a daily basis. Since it was a small class size, the teachers knew the students and their weaknesses and were able to adapt to what each student needed. ”
